MEMORANDUM FOR: Director of Training

SUBJECT: Comment from Student Critique of Phase II

This comment from a student critique of the recently completed Phase II appears to apply to the MTB enlisted men.

One group of students should have been segregated into their own group with one adviser. It was unfair to have them in competition with the others. Their morale was pretty low toward the end and several good men may have been lost to the organization because they were sometimes made to feel pretty foolish, through no fault of their own or of the instructor. They sometimes felt out of place in a class where contacts were close and they had difficulty following what was going on, let alone contribute to the discussion.
